**Python Deep Learning
JS Full Stack Developer**

TO WHOM IT MAY CONCERN,

Dear Sir / Madam,

I am sending this application for the position of Deep Learning, AI as well as JS Full Stack Developer.I have enclosed my resume along with this cover letter for your consideration. My resume also lists the professional experience and qualifications. I have been working at Concentrix Global as a Full Stack Machine Learning Developer for the last 3.5 years. My total work experience is around 12 years.I have done Data Visualisation using Python Image Classification using Neural Networks, Face Recognition & Fake News Detection using CNN. I have also designed & developed user interface for standard and custom web, enterprise, and mobile websites.

Working in Machine Learning and Neural Network Technologies.I have also written a program for text summarisation & spell check using nltk corpus as well as I have also built a neural network using Python

My project lists can itself speak for my excellent coding standards. You can see some of my work regarding details on my website at http://www.alokprofile.com. I can be reached anytime via email at alokranjan04@gmail.com or my cell phone +91 7042915552. Please find my resume attached along with the application. I would like to thank you and would appreciate a positive response.

**SINCERELY,
ALOK RANJAN**
